WORK EXPERIENCE

Full Stack Developer

Carteblanche Innovation Integrated

06/2020 - Present

CBII is a SaaS company and I've been responsible for developing artfully designed user-centric products and conducting user research + Design Thinking.

Achievements/Tasks

- Developed dynamic product web application from scratch while meeting all the performance and quality benchmarks using ReactJS and Redux.
- Built Server side API's with optimised quality to enhance the workflow of the product.
- 100% test coverage in all contributions using Jest and React Testing Library.
- Supervised and mentored 6 Junior Team Members and reviewed their codes to ensure high performance and enhance their skillset.
- Established and maintained the company's coding standards document choosing the best practices adopted in the industry.

ReactJS Developer

3 Musafir

09/2019 - Present

3M aims to build a globally recognized community and I've contributed to building the structure and model of the organization while developing the product's application.

Achievements/Tasks

- Developed ReactJS App to enhance the process of onboarding new members for the community.
- Communicating with clients and understanding system-specific requirements, enhancing the touchpoints to design a better User experience.
- Led UX research with a team of 3 people, to create user stories, non-functional requirements, and acceptance criteria, and prepared test cases.

Volunteer Experience

AIIESEC International Exchange Participant

06/2019 - 09/2019

Antalya, Turkey

Achievements/Tasks

- Led daily workshops to enhance soft skills of students such as public speaking and problem solving.
- Received a certificate of achievement for structuring and implementing one of the most effective course outlines.

EDUCATION

BS (Computer Science)

FAST National University Of Computers And Emerging Sciences

2016 - 2020

TOP SKILLS

ReactJS

Redux/Redux Saga

Python

Django

Git (VC)

UI/UX - Figma

Design Thinking + User Research

PERSONAL PROJECTS

VR/React based E-Commerce Web Application

- Final Year Project, which was an E-Commerce web application that also included VR to display how the items would look in real life. I handled the frontend using react technologies and libraries, and Redux-Saga for the middleware

Online Real-Time Collaborative Word Processing React Application.

- An application that solves the problem of collaborating with multiple users at the same time while documentation. Developed in React, Redux, and NodeJS

Self Flying Plane using Artificial Neural Networks

- Trained the machine to play an online 2D plane game, the training data included more than 30,000 pictures

House Price Prediction using Linear Regression Models

- Used Multi Dimension Linear Regression models to predict prices of houses based on the area, size, number of rooms and structure.

Learning Management System

- A learning management system for 3 types of users. Admin, Student and Teachers with all basic functionalities required by an LMS.

ACHIEVEMENTS

Material-UI OpenSource contribution (03/2022)

Arctic Code Vault Contributor (01/2020)

HackerRank ReactJs Certified

Silver Medalist in O'Levels

SOFT SKILLS

Public Speaking

Problem Solving

Team Player

Leadership (ENFJ-A)
