## WORK EXPERIENCE

### Full Stack Engineer

British American Tobacco (BAT)

08/2022 - Present

### Full Stack Developer

Carteblanche Innovation Integrated

06/2020 - 08/2022

#### Achievements/Tasks

- Developed dynamic product web application from scratch while meeting all the performance and quality benchmarks using ReactJS and Redux.
- Gathering user requirements, creating wireframes, and mapping them to high-fidelity UI/UX Designs.
- 100% test coverage in all contributions using Jest and React Testing Library.
- Supervised and mentored 6 Junior Team Members and reviewed their codes to ensure high performance and enhance their skillset.
- Established and maintained the company's coding standards document choosing the best practices adopted in the industry.

### Full-Stack Engineer and Growth Partner

3 Musafir

09/2019 - Present

3M aims to build a globally recognized community and I've contributed to building the structure and model of the organization.

#### Achievements/Tasks

- Developed ReactJS App to enhance the process of onboarding new members for the community.
- Building and mobilizing a community of 5000 people to rally under a common motive.
- Service design research, understanding service-specific requirements, and enhancing the touchpoints to design a better user experience.

### Leadership Development Experience

AIESEC (Global)

06/2019 - 09/2019

Antalya, Turkey

#### Achievements/Tasks

- Led daily workshops to enhance the soft skills of students such as public speaking and problem-solving.
- As a Global Volunteer, I tackled the Sustainable Development Goal of Quality Education.

## EDUCATION

### BS (Computer Science)

FAST National University Of Computers And Emerging Sciences

2016 - 2020

## TOP SKILLS

ReactJS

Redux/Redux Saga

Python

Django

Git (VC)

UI/UX - Figma

Design Thinking + User Research

## PERSONAL PROJECTS

### VR/React based E-Commerce Web Application

- Final Year Project, which was an E-Commerce web application that also included VR to display how the items would look in real life. I handled the frontend using react technologies and libraries, and Redux-Saga for the middleware

### Online Real-Time Collaborative Word Processing React Application.

- An application that solves the problem of collaborating with multiple users at the same time while documentation. Developed in React, Redux, and NodeJS

### Self Flying Plane using Artificial Neural Networks

- Trained the machine to play an online 2D plane game, the training data included more than 30,000 pictures

### House Price Prediction using Linear Regression Models

- Used Multi Dimension Linear Regression models to predict prices of houses based on the area, size, number of rooms and structure.

### Learning Management System

- A learning management system for 3 types of users. Admin, Student and Teachers with all basic functionalities required by an LMS.

## ACHIEVEMENTS

Material-UI OpenSource contribution (03/2022)

Pull Shark Bronze Medal (Github) (10/2021)

Arctic Code Vault Contributor (01/2020)

HackerRank ReactJs Certified

Silver Medalist in O'Levels

## SOFT SKILLS

Public Speaking

Problem Solving

Team Player

Leadership (ENFJ-A)
